SUMMARY

Experienced in Ruby on Rails and JavaScript based programming with a background in project organization. Possesses strong skills in team-building and project management that helps small teams deliver consistent and high quality results. Strong desire to create well organized systems & code structures as a result of previous experience in the high-end kitchen industry.

TECHNICAL SKILLS

Languages: CSS, HTML, JavaScript, JSON, Python, Ruby, SQL
Development Tools: Express, Git, jQuery, Rails, React, Redux
Operating Systems: Linux (Ubuntu), OS X(Yosemite to Catalina), Windows (XP, 7, 8, 10)

TECHNICAL PROJECTS

Path - Github(Front Back) | Demo Website
View and create the timelines of real or fictional people in detail or with a broader scope.
- Built with React, Rails, Firebase and Material-UI
- Limited fetch request & re-loading through persistent data which allows for a smoother user experience
- Created a separate work log file that allows for a more detailed & clear commit message system
- Implemented a responsive Javascript/CSS method which simulates zooming in on a timeline

Draw-Off - Github(Front Back) | Demo Website
A fun and collaborative party game where up to 8 players are given interesting prompts to draw and rate.
- Built with React, Rails, and Firebase and Material-UI
- Utilized Firebase for user authentication & password management
- Created rooms and live server interactions through custom backend routing

Code Wars - Github(Front Back)
A coding challenge game where players compete 1 on 1 to see who solves the algorithm first.
- Built with vanilla JavaScript & Rails
- Utilized JSON Web Tokens and localStorage to store encrypted user information client-side.
- Simulates a live server through constant fetch calls
- Simulates a JavaScript IDE aka online coding environment using the browser's own developer console to output user's code accuracy.

EXPERIENCE

Officina Resto Bar in Wholefoods Tysons, Tysons, WA - Assistant Kitchen Manager   11/2019 - 03/2020
- Created kitchen specific training guide which allowed for easier hiring of inexperienced workers
- Managed multiple restaurant schedules to increase efficiency for Wholefoods cafeteria
- Setup kitchen stations as part of opening team

Luvi, New Orleans, LA - Junior Sous Chef   08/2018 - 06/2019
- Created recipe book for pre-existing and new dishes which increased consistency of final product
- Interacted with customers while working the sushi bar to enhance customer's experience

EDUCATION

Flatiron School: Immersive Software Engineer Boot Camp - Washington, DC   01/ 2020 - 05/2020

Montgomery College, Rockville, MD - Associates in Business Management   08/2019

International Culinary Center, New York, NY - Professional Culinary Arts   03/2017
